Cheat: The game automatically spins, without a player input. To get it to stop, press the button again. Otherwise, enter the most recent pause command (:TASK_PAUSE). 2. Restricted spinner. This is a command that will allow you to get into a restricted mode for a short period of time. To activate it, enter: install: Disable_Sidewinder This will temporarily disable your pickup (if you have one) and make you invulnerable to the Sidewinder, allowing you to move around the map. 3. Rotate 360° for 30 seconds. To do this, enter: rotate 360° 30 This command will spin your view around 360 degrees, for 30 seconds. The console will have to be active to see the output. If you want to stop the animation, press the button again. Otherwise the command will automatically terminate after 30 seconds. A: Rofl some of these answers here. This is a quote from CS:GO Reddit "Spinbot is not just used to troll spectators. The OP should have a read through the CS:GO Wiki wiki. The answers to the questions the OP had would all be easily found by just searching a youtube video or visiting the forum at the csgo subreddit with the tag help.
