The serial number is stored in the config.ini file on the Autocad folder. (C:\ProgramData\Autodesk\AutoCAD\Application\Users\{your name}): In the above code your name is replaced with the username that you use to log into Autocad. (ProgramData is hidden by default, you may need to run the control panel then double click on the icon Windows key + R then type regedit and press enter. Hit enter on the key it says "ProgramData". You'll need to expand the tree view on the left. Select the key "HKEY_LOCAL_MACHINE\Software\Wow6432Node\Autodesk\AutoCAD\Application". Right click on the entry named Version.
