## MasterSeries X64 (2022)

The mastering program enables you to create an optimal master at all times. In this case, all you have to do is to open the desired stereo track and adjust its volume; MasterSeries will manage the parameters of the track automatically. In other words, you can concentrate on your work without having to hold the mouse. MasterSeries Features: ● Select frequency area and band width ● Select source type (PCM) and playback mode (normal or fast) ● Increase or decrease signal level (+/-) ● Output volume control (dB) ● Master volume control (dB) ● Bandwidth parameter ● Tone and stereo control ● Apply effects manually ● Select and apply effects on all tracks ● Save your compression presets as 'Tag' files ● Playback and playback mode (PCM / MP3) ● Playback formats (PCM / MP3) ● Default track ● Split recording/playback tracks ● Maximum number of tracks ● 16-bit PCM ● Audio/Video ● Speakers ● Speakers ● 48 kHz ● 44.1 kHz ● Mono / Stereo ● Mix ● Arrange tracks ● Import CD / CDDA ● Burn CD ● Disk management ● Prevent disk damage ● Clean tracks ● Delete track ● Reorder tracks ● Convert tracks to MP3 ● Rename tracks ● Set share ● Auto-Delete tracks ● Batch process ● Burn Data Files to CD ● Automatic process ● Compress tracks ● Delete tracks ● Duplicate tracks ● Duplicate tracks ● Split/Merge tracks ● Copy tracks ● Sort tracks ● Slideshow ● Display active disk ● Display only ● Use arrow keys ● Use mouse ● Roll up tracks ● Use focus marks ● Apply effects on active tracks ● Apply effects to specific tracks ●

### What's New in the?

• allows to compress any 16-bit stereo file at 44.1 or 48 kHz to a maximum of 14-bits. It uses a standard algorithm (VMMID-2). • the resulting compressed file is playable on any CD-player and allows to play the song from a burned disk like a burned CD. • the resulting compressed file is playable on any CD-player and allows to play the song from a burned disk like a burned CD. • it permits to burn the compressed file to a disk. • it permits to burn the compressed file to a disk. • the resulting compressed file is playable on any CD-player and allows to play the song from a burned disk like a burned CD. • it permits to burn the compressed file to a disk. • allows to do the technical encoding: frequency response, equalization, compression, trim, normalization, de-emphasis, run-length and silence detection. • it permits to do the technical encoding: frequency response, equalization, compression, trim, normalization, de-emphasis, run-length and silence detection. • it permits to export the resulting compressed file to standard wave files (.wav). • it permits to export the resulting compressed file to standard wave files (.wav). • it permits to export the resulting compressed file to standard wave files (.wav). • it permits to export the resulting compressed file to standard wave files (.wav). • it permits to export the resulting compressed file to standard wave files (.wav). • it permits to export the resulting compressed file to standard wave files (.wav). • it permits to export the resulting compressed file to standard wave files (.wav). • it permits to export the resulting compressed file to standard wave files (.wav). • it permits to export the resulting compressed file to standard wave files (.wav). • it permits to export the resulting compressed file to standard wave files (.wav). • it permits to edit the frequencies automatically and manually the frequency range to be between 0 Hz to 18 kHz and the maximum frequency slope according to the compression (standard or hard). • it is able to automatically adjust the frequencies of a file with a frequency envelope shape according to the compression (standard or hard). • it can automatically adjust the frequency of a file with a frequency envelope shape according to the
