
Ibm Lenovo T61 Bios Password Crack

Supervisor password (BIOS password) The administrator password (or BIOS password) is the password you enter when you boot your computer. With it, you can disable the computer recovery function. To disable the Restore Your Computer feature, you must know the administrator password. If there is no password, the BIOS will notify you that it is required. If no password is entered, the computer automatically restarts. If you try to boot your computer without a password, the BIOS displays a message asking you to enter it.
