Most important, the internal validity of this study was not assessed, given that we are not sure that a random sample of households was sought. We did not collect data on all possible variables related to economic welfare and HA. The 3-day dietary recall may overestimate intakes but has been used widely and is the dietary methodology most generally accepted by nutrition experts.^[@bibr30-1178223418759296]^ The imputation method may also result in overestimation of the prevalence of nutrient intake, but we believe that the findings would be valid. NovaAce Description: NovaAce will play a text slideshow which can be read in any standard text reading program or converted into formats read by those programs. The slides are taken from one of the many books in the NovaAce collection. The slideshow projects are in PFB, TTF, and STF format, and can be imported into the most commonly used project software, including PSP, Illustrator, and InDesign. There are two command line options - "noxav" and "noxavfull". The first is a full example, in which to specify the slide and the output file. The second is a smaller example, which shows the general syntax of the command line options. To play a slideshow, run the "noxav" or "noxavfull" command line options in the Directory of NovaAce content. For example: "cd path/to/library/NovaAce/content" "noxav full path/to/file.txt" NewzToolz will extract files that have been compressed into a RAR archive, decode or apply PAR files to fix files that you probably have downloaded from a newsgroup, combine several files into one larger file, download files from newsgroups that are pointed to by NZB files or review and sort pictures that you download from newsgroups using programs like J
