REQUIREMENTS: · Requires a password to start and log into the application. · Windows. Best app of the month - 8Apps These are the votes and comments for best app of the month:

-----"Passwords Pro is a very useful app. My coworkers at work can use this app for securing their logins, I use it on all of my PCs and my iPad. With many servers that I use, there is no way to share the logins/passwords, so it is necessary to use something like Passwords Pro. Also, with most browsers, when you save the password for one site, you cannot use that password on any other site. A single password will keep your credentials safe, but for my needs, I need to change up the passwords on multiple sites. I like that Passwords Pro is secure, but is also easy to use. It is very easy to create, edit, and share different passwords. I like that I can even change my master password. If you need an app

that will keep you safe and secure, and is easy to use, Passwords Pro is a great app to keep you and your data safe." The votes

The Perfect Password Generator is a software utility that will generate an unlimited number of unique passwords for you to use with ease. This utility is also useful for schools, work places and any other place where passwords are important. There are many other features in this program. You can add a number of rules and manipulate the generated passwords using the Keyboard and check them using the Security Logger. Every result is automatically logged for you to retrieve later. The program will automatically select the most common passwords in the English language (a total of 2,094 to be exact). You can even generate passwords using the Latin alphabet, but keep in mind that the longer the password, the harder it is to remember. So, you should use the most common passwords as you can. But, if you want to be extra careful, you can always create passwords using a combination of the Latin and English alphabets. The program supports passwords with both uppercase and lowercase letters. In addition to this, you can also use digits to create a password. The program will remove punctuation and special characters and will replace them with a “?” character. Features: - Create a large number of passwords using the keyboard - Modify the rules to select passwords - Password Monitoring via Security Logger - Automatic password selection for English language - Support for Latin and English languages - Password length restriction - Automatic password encryption - Password hash - Password Manager - Password Protection - Password Stretching - Run as service (Windows Vista and higher) The Perfect Password Generator is a software utility that will generate an unlimited number of unique passwords for you to use with ease.
