Keyman is a keyboard tool that enables you to change the state of your keyboard. It lets you switch between the different states of the keyboard, and can also be used as a keylogger. When you are using a keyboard with a different layout, you can change the keyboard's layout, using a button combination you can assign to the keyboard shortcut. With the keyboard tool, you can also create keyboard macros. A keyboard macro is basically a sequence of keyboard shortcuts, which you can assign to a keyboard shortcut and they will be performed when

---

the keyboard shortcut is pressed. Use in conjunction with a text editor or other apps You can use Keyman with various apps and it will work with any app that needs to know what key was pressed.
