## Undeepfree BETTERze 6

1) UndeepFreeze is a software which is runs on the same machine as Deep Freeze. It can manually override the password, update the client information or anything that you want to change in the client hard disk. 2) It will do all the work for you. It will ask for the old password and the new password. And it will update the boot sequence of the client accordingly. 3) In case of wrong password, it will ask you to enter it once again. 4) If you want to remove a client completely, you can use UndeepFreeze to disable the password for that client and remove the client completely. Congrats are in order on behalf of our team as the results for our fundraising initiative have come in and we have exceeded our first-year goal! We set the goal at a modest \$4000 to raise awareness for our program and to break even on sponsorship and goods. We are absolutely blown away by how successful our campaign has been! With people like you actively engaged and supporting our goals, the donation total is a whopping \$10,183!!! Now we need your help to spread the word and ensure that by the end of September we reach our next goal of \$11,500!!! So, how do you get in on the action? Head on over to our IndieGoGo campaign page and chip in with your credit card or contribute a few dollars. With your help, we can reach our next goal. Thanks to you and your support, we can take the next step in our fundraising journey and truly make a difference in the lives of our participants and
